

### **Easics – short company profile**

Easics is a System-on-Chip design company, targetting designs in FPGAs and digital & mixed-signal ASICs.

Easics designs robust and scalable high-performance & low-power embedded systems

for leading product companies active in medical equipment, machine construction, measurement equipment, multimedia, avionics, and wired & wireless telecommunications.

Easics is based in Leuven, Belgium, and was founded in 1991 as a spin-off from IMEC and the Katholieke Universiteit Leuven.
